Indiana County

$m{T}$ his report describes property tax changes in Lake County between 2012 and 2013.

Property tax changes in 2013 were affected most by local factors, such as changes in assessed values, deductions, levies, credits, and tax rates. However, three statewide trends affected a large number of counties.

- First, pay-2013 was a statewide reassessment year. In past reassessments there
 were double-digit percentage increases in assessed values, but this time
 assessments were almost unchanged statewide. The difference was trending, which has been adjusting
 assessments annually since 2007. Few counties experienced large assessment increases in 2013. Many
 experienced assessment decreases.
- Second, farmland assessments continued to rise, with the base rate of an acre increasing 8.7% from \$1,500 to \$1,630. High commodity prices and low interest rates were the reason. Rising farmland assessments were especially important in rural counties, where farmland is a larger part of total assessed value.
- Third, many local income tax credit rates increased substantially. This was due to a corrected distribution of local income tax revenues to local governments. Extra income tax revenue was applied to tax credits in 2013.
 This may mean that credit rates will fall (and tax bills will rise) in 2014.

Still, local factors were most influential in individual counties in 2013. Here is what affected taxes in Lake County.

	Average Change in Tax Bill, All Property	Total Levy, All Units	Certified Net Assessed Value	Tax Cap Credits % of Levy
2013	3.8%	\$710,250,281	\$20,415,984,365	16.7%
Change		1.8%	-0.3%	
2012	-1.9%	\$697,391,613	\$20,469,341,196	16.7%

The total tax bill for all taxpayers in Lake County increased by 3.8% in 2013. In this reassessment year, certified net assessed value decreased by 0.3%. A rise in the levy and drop in certified net assessed value caused an increase in the average tax rate. The 3.8% increase in net taxes was due to the higher tax rate being charged against actual billed AV which grew by 2.0%. Tax cap credits as a percent of the levy remained unchanged at 16.7% in 2013.

Lake County homeowners experienced a 3.1% increase in property tax bills in 2013. This was due to an increase in property tax rates. Statewide, the average homeowner's tax bill was almost unchanged.

Net AV equals gross AV less deductions and exemptions. Certified net AV is set with the budget, certified by the county auditor and used to calculate tax rates. It may be adjusted by the auditor to account for appeals. Net AV in the above table is summed from tax bills. It includes TIF allocations while Certified net AV does not. Gross AV also is summed from tax bills. Circuit breaker tax caps are calculated on gross AV.

Lake County's total billed net assessed value increased by 2.0% in 2013. Increases in business assessments were the main reason. Net assessed value for all of Indiana was nearly unchanged, rising by only 0.1%.

Notes: A Taxing District is a geographic area of a county where taxing units overlap, so the sum of the taxing unit tax rates is the total district rate.

The Tax Rate is the gross levy divided by net assessed value, in dollars per \$100 assessed value.

The LOIT, COIT, and CEDIT credits are funded by local income taxes.

The Net Tax Rate for Homesteads is calculated by reducing the tax rate by the various credit percentages.

Notes: Circuit breaker tax cap credits are tax savings for taxpayers and revenue losses for local government units. Circuit breaker credits are highest in tax districts with the highest tax rates. These are usually districts that include cities or towns because the municipal tax rate is included in the district tax rate. This means that most circuit breaker credits are in cities and towns and in units that overlap cities and towns.

Circuit Breaker Credit Types:

Homesteads are owner-occupied primary residences and include homestead land and buildings in the 1% tax cap category. Owner-occupied mobile homes and agricultural homesteads are included in this category. This category only includes credits on the portion of the property that qualifies as a homestead.

Other Residential/Farmland includes small rental housing units, larger commercial apartments, second homes, long-term care facilities, and farmland, in the 2% tax cap category.

All Other Real/Personal is commercial, industrial, and utility land and buildings, and business equipment, including agricultural equipment, in the 3% tax cap category. This category also includes credits on the portion of homeowner properties that do not qualify as a homestead.

Elderly includes credits for the 2% annual limit on homestead tax bill increases for low-income homeowners, age 65 and over. The *Total Levy by Unit* is gross property taxes levied, before all tax credits. For TIF districts, this amount represents the TIF proceeds before circuit breaker credits. This information is included to allow comparison to the circuit breaker revenue losses.

Numbers may not total due to rounding.
